ALLERDERM® SPOT-ON FOR SMALL DOGS & CATS

Virbac

DERMATOLOGICAL SPOT-ON

FOR SMALL DOGS & CATS

DERMATOLOGY

EZ Compliance™

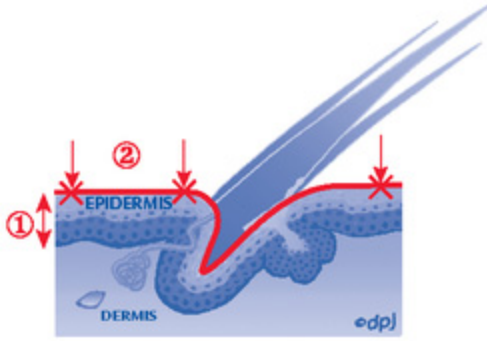

Skin Lipid Complex (Ceramides, Fatty Acids)

INTEGRITY & HEALTH OF SKIN & HAIRCOAT

FOR BEST RESULTS: please follow directions as provided by your veterinarian and as indicated on this package.

USES: ALLERDERM® Spot-On contains Skin Lipid Complex, an exclusive blend of ceramides and fatty acids similar to those found in normal, healthy feline and canine skin. **ALLERDERM® Spot-On** is formulated for use in topical skin care for dogs and cats with damaged or compromised skin. It is specially formulated to provide adjunctive therapy for pets with skin disease by combining ingredients that help restore skin integrity and balance

The application of **ALLERDERM® Spot-On** restores the **protective barrier function of the epidermis (skin)** **(1)** resulting in **enhanced hydration, less sensitivity and more protection. Renewed epidermal integrity helps the skin help itself to stay healthy (2).**

CONTAINS: Ceramides and Fatty Acids

DIRECTIONS FOR USE: To open: hold the pipette upright and twist off the top.

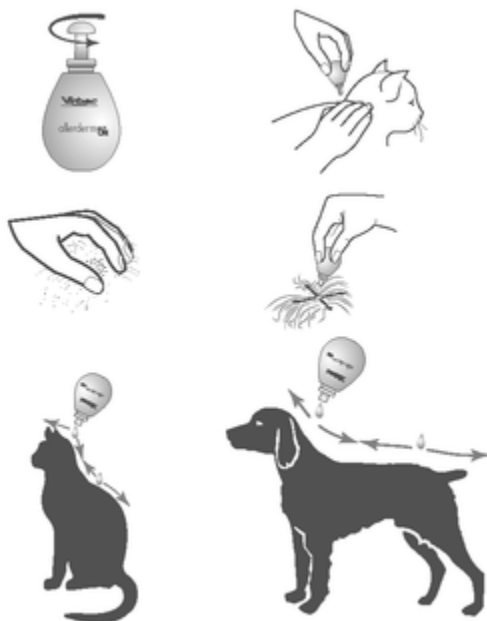

For cats: Part the cat's hair coat at the base of the neck until skin is visible. Place the tip of the pipette directly in contact with the skin and squeeze gently to apply half of the contents to the skin. Repeat this procedure between the shoulder blade.

For dogs: Part the dog's hair coat between the shoulder blades until skin is visible. Place the tip of the pipette directly in contact with the skin and squeeze gently to allow the contents to apply to the skin. Repeat this procedure along the dog's back.

ALLERDERM® Spot-On may also be applied directly on problem skin areas and lesions.

INITIAL DOSE: One (1) pipette per week for 4 weeks. In severe cases, two to three (2 to 3) pipettes per week may be used, up to one per day if necessary.

MAINTENANCE DOSE: To prevent relapses, and for skin and hair coat health maintenance: one (1) pipette per month.

For best results apply after bathing the cat or dog, when the fur is completely dry.

Avoid prolonged storage at temperature above 77°F (25°C).
