

Allerpet C and Allerpet D are non-toxic, grooming emollients that cleanse the animal's hair of the antigens considered to be the prime cause of people's allergic reactions to cats and dogs. Both of these products are designed for people who are allergic to cats or dogs.

Directions

Before using Allerpet, comb your pet thoroughly with a fine-tooth comb to remove as much dead hair as possible. Moisten a sponge or washcloth with Allerpet and "drywash" your pet by rubbing the fur both with and against the lay of the hair, making certain that you dampen it to the skin. Do not saturate the hair. Pay particular attention to the areas of the body that your pet licks more often. Dry with a towel. Repeat this procedure once a week. Allerpet also conditions the hair and moistures the skin. It is non-oily and will not leave a residue. The 12 oz bottle will last approximately 3 months for cats.

Ingredients

DI UV Water; Quaternium-26; Glycerin; Quaternium-22; Allantoin; Panthenol; Aloe Vera Gel; Steartrimonium Hydroxyethyl Hydrolyzed Collagen; Sodium Styrene/PEG-10 Maleate/Acrylates Copolymer (and) Ammonium Nonoxynol-4 Sulfate; Hydrolyzed Animal Protein; Citric Acid; DMDM Hydantoin; Methylchlorothiazolinone (and) Methylisothiazolinone. Net Wt. 12 fl. oz. (355mL)
