

AlphaTRAK 2 Blood Glucose Monitoring System Kit

The AlphaTRAK 2 is a portable blood glucose monitoring system validated for cats and dogs. The AlphaTRAK Kit contains an AlphaTRAK 2 Meter, 25 Test Strips, Control Solution, 30 Lancets and a Lancing Device, Quick Users' Guide, a Carrying Case, Diabetes Diary and Instructional Video.

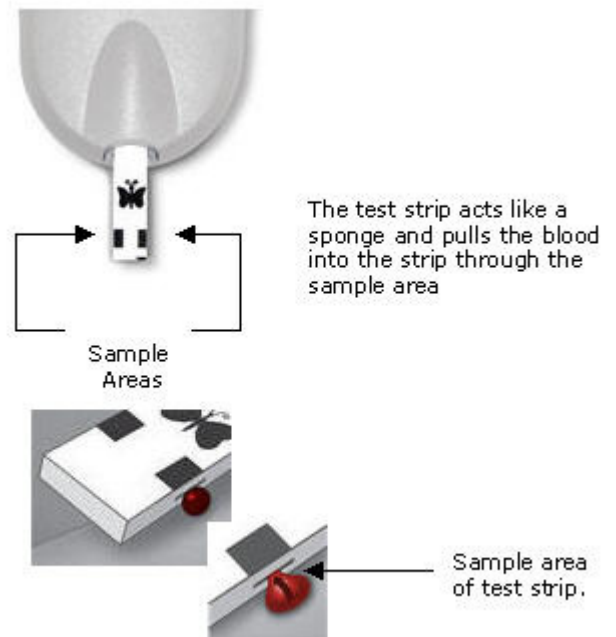

Get the accuracy of a reference laboratory in the palm of your hand.

You depend on accurate¹ blood glucose measurements to manage canine and feline diabetes. To ensure accuracy, monitors must be calibrated and validated for species-specific blood.

Introducing AlphaTRAK 2 a hand-held system validated specifically for cats and dogs. AlphaTRAK 2 is validated to reference lab values to assist you in providing appropriate care.

Reliable sample detection technology ensures clinical precision.

- Meter will not start until it detects enough blood
No false results
- Add more blood for up to 60 seconds
- Meter beeps when sample is adequate,
and begins test
Eliminates wasted strips

AlphaTRAK 2 is easy on cats and dogs.

- Patented technology means the AlphaTRAK 2 requires the world's smallest blood sample only 0.3 μL .
- AlphaTRAK can use capillary blood; no venous puncture is needed.

AlphaTRAK 2 is easy on you.

- Portable moves to the animal
- Accurate results for cats and dogs
- Cost-effective
- Fast results in seconds
