DASUQUIN® SOFT CHEWS FOR SMALL TO MEDIUM DOGS

Nutramax Labs.

Dasuquin is the exclusive veterinary formulation that contains the potent combination of glucosamine hydrochloride, low molecular weight chondroitin sulfate, and avocado/soybean unsaponifiables (ASU). Dasuquin is formulated to deliver maximal cartilage support.

Administration as a supplement for dogs

| Dog's Weight | Number of soft chews/day | |
|--------------|--|-----------------------------|
| | Initial 4-6 week administration period | Suggested maintenance level |
| 10-29 lbs. | 1 | 1 EOD* |
| 30-59 lbs. | 2 | 1 |

*Every other day

The recommended initial administration period is 4-6 weeks; however, some dogs may respond in a shorter period of time. If desired, the number of Dasuquin soft chews may then be reduced to a maintenance level. The maintenance level can also be used long-term on healthy dogs to help support their joints.

Guaranteed Analysis-Each Soft Chew Contains:

| | |
|---|-----------|
| Glucosamine Hydrochloride* 99% | 600 mg† |
| Sodium Chondroitin Sulfate* | 250 mg† ▲ |
| Avocado/Soybean Unsaponifiables* (ASU) Powder | 45 mg† ▼ |

Other Ingredients: Starch, glycerin, natural flavor, vegetable oil, polyethylene glycol, silicon dioxide, sucralose, gum resin, soy protein isolate, tea, titanium dioxide, mixed tocopherols, BHA (a preservative), and BHT (a preservative).
