DERMOSCENT® ESSENTIAL 6 SPOT-ON

Aventix

Animal Dermo-Care

Hypoallergenic

Dermoscent® Essential 6 spot-on: A revolutionary skin and coat care product for dogs and cats with all types of skin and coat conditions.

Dermoscent® Essential 6 spot-on is formulated with 100% natural plant sourced active ingredients. Hemp seed and neem seed oils provide a high concentration of essential fatty acids with an optimal omega 6 to 3 ratio of 4:1. These vegetable oils combined with ten essential oils (rosemary, lavender, melaleuca, cedar, oregano, clove, camphor, wintergreen, peppermint, curcuma) along with vitamin E, are scientifically blended in this patented formula designed to replenish the hydrolipidic film, hydrate the skin, and help reduce shedding and control odor.

Veterinarian controlled clinical trials on 195 dogs and 73 cats demonstrated a significant improvement in coat and skin condition in more than 95% of tested animals after just 4 weeks of use.

Application Instructions:

Begin initial treatment with the application of one pipette once weekly for 8 weeks followed by regular application of 1 pipette every two weeks to maintain improved condition. Apply contents of one pipette directly to skin, between the shoulders. Improvement in coat condition is most often seen within the first 3-4 weeks.

Do not shampoo 48 hours before or after using Essential 6® spot-on. Do not rub in. Leave on area to diffuse naturally. For long-haired animals, it is recommended to brush the application site 24 hours after the application in order to remove any residue remaining on hair.

Essential 6[®] spot-on is compatible with other spot-on products. However if applied simultaneously, it is recommended spot-on products be applied onto different areas, or space treatments 48 hours apart.

Recommended for cats and dogs over 3 months of age. For external use only. Use entire pipette upon opening. Keep out of reach of children. Store at room temperature.

Essential 6[®] spot-on has been shown to be safe and well tolerated by dogs and cats through extensive testing. In the extremely rare event skin irritation or redness should occur, wash the treated area with a suitable mild cleanser soon after application to facilitate removal of the product. Rinse thoroughly and discontinue use. Contact your veterinarian if there is any persistent reaction.

Essential 6[®] spot-on has been certified safe if animal accidentally ingests. No immediate treatment is indicated other than to monitor closely for any adverse effect which has not yet been observed. Care should be taken to avoid application site making contact with fabric, leathers or varnished materials immediately following application.

Dermoscent[®] Essential 6 spot-on is formulated with 100% natural active ingredients with no added fragrance.

Based on carefully selected pure essential fatty acids and essential oils, Dermoscent[®] offers a full range of skin care products for dogs and cats including:

Dermoscent BIO BALM[®] for dogs, a repairing and protective balm for foot pads, nose and callus areas.

Dermoscent[®] Essential Mousse, a convenient and innovative rinse-free/soap-free mousse used to cleanse, soothe and deodorize the skin and coat.

Available exclusively through veterinarians. For external use on animals only.
