

Enzymatic Rawhide Chews For Medium Dogs

Sogeval Enzymatic Rawhide Chews for Dogs are recommended to help keep teeth clean and freshen breath. Enzymatic Rawhide Chews are made from carefully selected beef hide that is cut and cooked before being coated with a palatable enzymatic blend. The enzymatic blend contains Glucose oxidase and Lactoperoxidase that help maintain the natural antibacterial salivary system.

The abrasive texture of the rawhide chews also have a mechanical cleaning effect on teeth. the regular use of Enzymatic Rawhide Chews helps prevent plaque and tarter build-up, keep the mouth healthy and the teeth clean. The palatable poultry flavor makes them a real treat.

Comparable to CLENZ-A-DENT Rawhide Chews
