ESBILAC® POWDER

PetAg

Puppy Milk Replacer

Food supplement for dogs

For puppies newborn to 6 weeks of age

#1 Selling Brand

All natural with vitamins, minerals and trace nutrients

Directions for Mixing Esbilac® Powder

Gently stir or shake 1 part powdered Esbilac into 2 parts warm water (a part may be a teaspoon, tablespoon or cup). Do not mix more Esbilac than can be consumed in 24 hours. Do not use a blender. Reconstituted Esbilac should be kept refrigerated. One 12 oz (340g) can of powder makes approximately 60 oz (1800ml) of liquid mixed 1:2. One 28 oz (794g) can of powder makes approximately 140 oz (4140ml) of liquid mixed 1:2.

Directions for Feeding

All puppies should receive their mother's milk for at least 2 days, if possible. This colostrum milk gives extra nutrition and temporary immunity against some diseases. Warm reconstituted Esbilac to room or body temperature before serving. **Feed puppies 2 tablespoons (30ml) of liquid Esbilac per 4 ounces (115g) of body weight daily. The daily feeding amount should be divided into equal portions for each feeding.** Puppies' needs will vary and this amount may have to be increased or decreased depending on the individual. Young and/or weak puppies should be fed every 3 to 4 hours. Older puppies can do well being fed every 8

hours. Weigh the puppies 3 times per week to assure adequate feeding. **Consult your veterinarian for additional advice.** The PetAg 2 oz (60ml) or 4 oz (120ml) Small Animal Nurser is suited for feeding most puppies. When puppies are old enough to lap, begin offering reconstituted Esbilac in a saucer. During the 5th week mix reconstituted Esbilac with Esbilac[®] 2nd Step[™] Puppy Weaning Food. Use of the Esbilac and 2nd Step will allow the puppy to be gradually switched to solid food. **Pregnant and lactating females:** Feed 2 teaspoons (4g) Esbilac powder per 5 lbs. (2.2kg) body weight daily. **Growing puppies already on solid food, show dogs, and/or convalescing dogs:** Feed 1 teaspoon (2g) Esbilac powder per 5 lbs. (2.2kg) body weight daily by top dressing food.

Storage

Reconstituted Esbilac must be kept refrigerated for up to 24 hours. Opened powder must be refrigerated for up to 3 months, or can be frozen for up to 6 months to preserve freshness.

Ingredients

Vegetable oil, dried skimmed milk, casein, cream, DL-methionine, L-arginine, calcium carbonate, choline chloride, lecithin, magnesium sulfate, potassium chloride, monopotassium phosphate, salt, tricalcium phosphate, carrageenan, dipotassium phosphate, taurine, ascorbic acid, ferrous sulfate, zinc sulfate, vitamin A supplement, vitamin E supplement, niacin supplement, calcium pantothenate, copper sulfate, thiamine hydrochloride, pyridoxine hydrochloride, riboflavin, manganese sulfate, vitamin D3 supplement, potassium citrate, potassium iodide, folic acid, vitamin B12 supplement, menadione sodium bisulfite complex, biotin.
