FELIWAY® ELECTRIC DIFFUSER

Ceva Animal Health

The secret to happy cats

When a cat feels safe in its environment, it rubs its head against the furniture, the corners of walls or the bottom of the curtains, leaving substances called facial pheromones. These pheromones convey a message of well-being, calm and absence of stress.

When there are changes in the cat's environment (such as visits to the veterinarian, return from hospitalization, moving to a new home, new arrivals, rearrangement of furniture), or if the cat is scared, a state of unrest or stress may develop. This state can be conveyed by changes in behavior, such as urine marking, vertical scratching, loss of appetite, or refusal to play and interact.

In these situations, FELIWAY Diffuser can be used to restore the natural balance. FELIWAY Diffuser mimics the cat's facial pheromones, creating a state of well-being and calm.

Composition:

Synthetic analogue of the F3 fraction of feline facial pheromone	2%
Excipients to	100 g.

Uses:

FELIWAY Diffuser enables reactions to stressful situations to be controlled and avoided.

Reactions to stress expressed as:

Urine marking, Vertical scratching, Loss of appetite, Reduced desire to play, Reduced desire to interact

In the following situations:

Moving to a new house, Visits to the veterinarian and return from hospitalization, Adoption, Rearrangement of furniture, Vacation homes, New arrivals, Overcrowding

Instructions for use:

- 1 Remove the vial cap.
- 2 Screw the diffuser onto the vial and gently tighten.
- 3 Plug the diffuser into an electric socket.

**For urine marking or scratching:**

Place the FELIWAY Diffuser in the room where marking has taken place. If the cat marks several rooms (with a total surface area of more than 650 sq. ft.), place another diffuser in one of the other rooms that have been marked.

For loss of appetite or reduced desire to interact and play:

Plug in the FELIWAY Diffuser in the room most used by the cat. Plug diffuser unit in an open area. Do not place behind furniture.

Active area: 500 to 650 sq. ft.

One vial lasts approximately four weeks.

For best results:

Plug in the diffuser 1 hour prior to acclimating the cat to the area. Diffuser is intended for continual use. Although fluid may remain after 6 weeks, the vial should be replaced.

Presentation:

Pack contents: One diffuser + one 48 ml vial.

Refill: One 48 ml vial.

The diffuser is specially designed for this product. The properties of the product cannot be guaranteed if a different device is used.

Precautions:

Keep out of reach of children.

Do not cover.

Check that the main voltage is the same as indicated on the device. Do not place underneath or behind furniture. When plugged in, do not touch the device with metal objects.

When plugged in, do not touch the device with wet hands.

During and immediately after use, do not touch the device with your hands.

The electric device should only be used with this FELIWAY Diffuser formulation. Use of another substance may increase the toxicity or flammability of the product. The surfaces of the device reach high temperatures to encourage evaporation of active ingredients - these surfaces should not be touched during use of the product.

In case of contact with eyes, wash them immediately with water and seek the advice of a doctor.

Avoid contact with skin. In case of contact with skin, wash thoroughly with soap and water.

If the product is swallowed, consult a doctor immediately and show him/her the packaging.

Empty packaging and any remnants of the product should be disposed of in accordance with current regulations covering disposal of waste products.

The physiological effects of this product were not tested by Underwriters Laboratories.
