

Hy-Optic Eye Drops with Hyaluronic Acid

Product Description:

Hy-Optic is a veterinary-researched, developed and clinically demonstrated sodium hyaluronate eye solution that has been shown to be effective in several eye conditions in companion animals. Hy-Optic is the first product on the market designed specifically to suppress inflammation and enhance healing of animals affected with dry eye and related conditions. Hyaluronic Acid (HA) is a naturally occurring glycosaminoglycan with its highest concentration in soft connective tissue and fluids found throughout the body. It is extremely important in the health and lubrication of the eye. When disease process occur, HA amounts decrease. HA is all natural, non-toxic and safe.
