

Methocarbamol 750 mg, 100 Tablets

Product Description:

Methocarbamol 750mg Tablets are indicated as an adjunct to therapy of acute inflammatory and traumatic conditions of the skeletal muscle and to reduce muscular spasms in dogs and cats.

Side Effects:

Side effects can include sedation, salivation, emesis, lethargy, weakness and ataxia in dogs and cats. Animal's urine may darken over time, but need not be a concern.

Contraindications:

Sedation may become more exaggerated when taken with other sedatives.

Drug Interactions:

Because Methocarbamol is a CNS depressant, additive depression may occur when given with other CNS depressant agents.

Over dosage:

Excessive doses in dogs and cats may be represented by emesis, salivation, weakness and ataxia.

Caution:

Methocarbamol should be used with caution during pregnancy. Keep out of reach of children.

Storage:

Methocarbamol tablets should be stored at room temperature in a tight container.
