

ProDen PlaqueOff Animal For Dogs & Cats

For Healthier Teeth & Gums

Adding **ProDen PlaqueOff Animal** to dry or wet food every day helps improve tooth and gum health in cats and dogs. It is a patented, unique and completely natural food supplement and is formulated with only specially selected seaweed (D 1 070) found to have specific beneficial effects for oral care. Contains no artificial colors, preservatives, gluten or sugar. Improvement is seen within 3-8 weeks, including better breath and a reduction or softening of plaque and tartar. A small bottle will last up to a year for a small dog or cat or around 3 months for a large or giant dog.

- Effective against bad breath, tartar and plaque
- Granules are easily added to food every day
- Free from artificial colors, preservatives, gluten and sugar
- Completely natural
- Improvement seen within 3-8 weeks
- Works systemically through saliva

The only dental product that works systemically through the blood stream!

Unlike other methods of plaque control, ProDen PlaqueOff Animal works systemically and is thought to disrupt the biofilm, reducing levels of plaque and calculus as well as improving breath odor.

There are no known side effects; however, due to the rich iodine content of seaweed, this product is not recommended for animals undergoing treatment for certain thyroid conditions.

Directions: Add ProDen Plaque to dry or wet food on a daily basis.

• Size	Daily dosage	Average Supply Based on 60gm Size
Small Dogs & Cats up to 25 lbs	1/2 scoop	1 year
Medium Dogs 25-50 lbs	1 scoop	6 months
Large & Giant Dogs over 50 lbs	2 scoops	3 months

ProDen PlaqueOff has not been tested on pregnant, whelping or lactating bitches therefore we suggest that it not be given during this period.

Scoop measurement: 1/3 of a 1/8 teaspoon measure.
