ANTISEBORRHEIC

KERATOPLASTIC

SEBOLUX[®] Medicated Shampoo with Spherulites[®] is a unique antiseborrheic and keratoplastic shampoo. It removes scales and crusts associated with seborrhea and other nonspecific dermatoses while leaving the skin clean and the coat soft and lustrous.

SPHERULITES: an exclusive and patented encapsulation system developed by Virbac; provides a slow release of ingredients long after product application.

Chitosanide: a natural biopolymer that creates a protective film on the skin and hair. This reinforces the hydrating and restoring effects of the formulation, helping to protect the skin against damage from the environment.
