URINE-AWAY™ SOAKER

Ceva Animal Health

Pet Urine Eliminator

- Permanent relief from pet urine odor and stains.
- Fast, easy and effective.
- Works at the molecular level.
- Eliminates the problem for good.
- Ideal for behavior related urine problems.

Safe. Non-toxic. Non-irritating. Biodegradable.

How Urine-Away works is why it's better.

Urine-Away is made with a proprietary, triple-action formulation that works at the molecular level to eliminate urine and odor for good.

1. Bonding

Urine-Away utilizes a powerful exchange and sharing of electrons to capture the malodor molecules within seconds of application and neutralize them permanently.

2. Absorption

Urine-Away encapsulates the malodor substance into its inner molecular structures to permanently eliminate the smell.

3. Counteraction

There are certain pairs of molecules that have a neutralizing effect on each other when they are in the same area. In other words, they cancel each other out. Urine-Away utilizes this molecular activity to overtake the malodorous molecules.

Urine-Away eliminates the need to use urine pretreatment products, masking agents, slow-acting enzyme deodorants or other methods. Unlike Enzymatic products, Urine-Away is still effective after soap or detergents have been used. Just apply and let dry.

Directions:

Remove excess urine from area being treated, then apply Urine-Away™ directly to the affected area and allow it to dry. For best results, apply a liberal amount of Urine-Away to ensure it comes in contact with all the odor molecules from the urine. The amount of Urine-Away used needs to equal the amount of pet urine.

NOTE: Urine can spread in sub-flooring and carpet padding; and wick up vertical surfaces. Spot test in inconspicuous area before using.

For pets with inappropriate urination problems:

Urine-Away permanently eliminates urine odor and stains found on horizontal surfaces such as upholstery, carpet, flooring, etc., which can return to the surface and continue to cause stains and odor. Ideal for eliminating accidents while potty training.

It is recommended to use D.A.P.®, a synthetic canine pheromone, in combination with behavior modification for dogs with inappropriate urination due to stress-related behavior issues.

Non-toxic, however, keep out of the reach of children.

For external use only.
