

Ursodiol (Actigall) 300 mg, 100 Capsules

Description:

Ursodiol is a bile acid used to treat certain liver and gallbladder diseases in dogs and cats. It may also be used for gallstones that contain cholesterol.

Directions:

Ursodiol is not FDA approved for use in animals; however, it is a commonly accepted practice for veterinarians to use this medication in dogs and cats. Give this medication as directed by your veterinarian. Dosages may vary based on the severity of symptoms. Give this medication with food.

Side effects

Side effects of ursodiol include diarrhea, vomiting, depression, or jaundice.

Precautions:

Ursodiol should not be used in animals allergic to it or other bile acid like drugs. Do not use this product in rabbits, guinea pigs, or other similar animals. Use with caution in animals with pancreatitis, bile duct obstruction, or inflammation of the gallbladder or bile ducts. Do not give this medication with aluminum containing antacids. Do not give with acetaminophen. The safety of ursodiol in pregnant or lactating animals has not been determined in all animal species. Always tell your veterinarian and pharmacist what other medications your pet is taking.

Storage:

Keep medication in the container, tightly closed. Store at room temperature, away from excess heat, light and moisture. Throw away any medication that is outdated or no longer needed.

Warnings:

Keep out of the reach of children and pets.
